## Call for Papers

The Joint International Semantic Technology Conference (JIST) is a regional federation of Semantic Technology related conferences. The mission of JIST is to bring together researchers in Semantic Technology research community and other areas of semantic related technologies to present their innovative research results or novel applications of semantic technologies.

JIST 2014, under the theme “*Open Data and Semantic Technology*”, solicits the submission of original research papers on Semantic Web and other semantic technologies, as well as papers on applications of semantic technologies.

## Topics for Regular Technical Sessions

- Ontology and Reasoning
- Management of Semantic Web Data
- Linked Data
- Big Data and Semantics
- Social Semantic Web
- Semantic Social Media
- Semantics and NLP
- Semantic Multimedia
- Applications of the Semantic Web, etc.

## Topics for In-Use Track

- Analysis and evaluation of semantic tools
- Semantic Web ontologies/ datasets used in practice
- Mobile applications based on semantic technology
- Semantic technology in new application domains:
  - eGovernment
  - eHealth
  - Smart City
  - Biomedical and Life Sciences
  - Sensor Networks
  - Telecommunications
  - Cultural Heritage
  - Financial Services
